ITEM 996 Maximum Liability Loss or Damage

(revised 09/01/11)

Claims when valid will be paid at actual loss or damage (invoice cost) or released valuation, whichever is less.

NOTE 1 Carrier's maximum liability in the event of loss or damage will be determined separately for each distribution package lost or damaged by multiplying the weight of such distribution package by 500 cents per pound (See Note 2).

In no case will carrier's liability exceed the actual value (Invoice Cost) of the property lost or damaged. The term "distribution package" means any primary shipping package authorized by the provisions of individual tariffs or classification. When a number of distribution packages have been unitized, strapped or otherwise fastened together, or contained on pallets, platforms or skids, or have been over-packaged in an additional complying package, the carrier's maximum liability will be determined by separately multiplying the released value times the weight of each individual distribution package lost or damaged, and not on the packages unitized, strapped or otherwise fastened together or contained on pallets, platforms or skids, or over-packaged in an additional complying package.

Carriers maximum liability for clients with FAK's, base rates other than Current CZARLite rates, pallet pricing, or other special pricing, will be determined by multiplying the weight of the distribution package by 100 cents per pound unless an individual approved written tariff or contract, stating otherwise, is in place at time of shipment.
